RE: SB 1661 Report – Status of California Pacific Medical Center – California East Campus
(Facility ID 12421)

Dear Mr. Tokas,

We are in receipt of a letter from Mr. John Gillengerten advising us that a report of the status of seismic compliance for the above referenced facility is required under Senate Bill 1661. I am responding on behalf of California Pacific Medical Center.

1. The California East campus of CPMC has no buildings that are subject to Health & Safety Code Section 130060(a) at present. California East Campus is one of a number of campuses consolidated under a single license. All acute care service at California East was removed (“de-licensed”) from the CPMC license in 2005. Sub-acute and licensed outpatient services remain in operation at the campus. A letter dated February 14 2006 describing this action and a copy of CPMC’s 2006 license demonstrating the absence of acute care at the California East Campus was sent to your office to remove this facility from further consideration for SB 1953 compliance.
2. De-licensing of acute beds at the California East Campus resulted in a reduction of the total number of licensed beds under the CPMC consolidated license. The capacity will not be replaced. Capacities previously in place at California East were not used to justify Diminished Capacity extensions for any campus operated under CPMC’s consolidated license.
3. Per the description in Item 2 above, there will be no construction project.
4. De-licensing of the acute care functions of the California East campus was requested in an amended licensing application submitted to the Department of Health Services in April 2005. All buildings included on the Matrix of Construction for Facility 12421 were included in the de-licensing action. The buildings include Building 1 1968 ‘A’ Building and Building 2 1939 ‘B’ Building Original Hospital.

Please direct any questions to my attention.

Sincerely,

Carl Scheuerman
Agency Coordination Manager/Planner
